Forward Looking Statement

Information set forth in this presentation contains forward-looking statements within the meaning of safe harbor provisions of the Private Securities Litigation Reform Act of 1995 relating to future events or our future performance. All statements contained in this presentation that do not relate to matters of historical fact should be considered forward-looking statements, including, but not limited to, expectations regarding monetization of backlog, the potential for the expansion of the backlog and statements regarding long-term growth prospects. In some cases, you can identify forward-looking statements by terminology such as “may,” “should,” “expects,” “plans,” “anticipates,” “believes,” “estimates,” “predicts,” “potential” or “continue” or the negative of these terms or other comparable terminology. Those statements are based on information we have when those statements are made or our management’s current expectation and are subject to risks and uncertainties that could cause actual performance or results to differ materially from those expressed in or suggested by the forward- looking statements. Factors that may affect our results, performance, circumstances or achievements include, but are not limited to the following: (i) our ability to scale up our operations, including market acceptance and large-scale adoption of our vision-based sensor products, (ii) the amount and timing of future sales and our long and unpredictable sales cycles, (iii) our ability to maintain product quality and performance at an acceptable cost and meet technical and quality specifications, (iv) our ability to accurately estimate the future supply and demand for our solutions and changes to various factors in our supply chain, (v) the market for adoption of vision-based sensor technologies, (vi) compliance with existing laws and regulations and regulatory developments in the United States, Israel, and other jurisdictions, including trade control laws, export authorizations and safety regulations, (vii) our plans and ability to obtain, maintain, and protect intellectual property rights, including extensions of patent terms, and our ability to avoid infringing the intellectual property rights of others, (viii) the need to hire additional personnel and our ability to attract and retain such personnel, including key members of our senior management, (ix) our estimates regarding expenses, backlog, future revenue, capital requirements and need for additional financing, (x) our dependence on third parties, including suppliers and strategic partners, (xi) our dependence on a limited number of customers for a substantial portion of our revenues, and the impact if order volumes from existing or

anticipated customers do not meet expectations (xii) our financial performance and history of operating losses, (xiii) the growth of regulatory requirements and incentives, (xiv) the incorporation of artificial intelligence, or AI, and machine learning, or ML, into our products, (xv) risks related to product liability claims or product recalls, (xvi) cybersecurity risks and potential data security breaches, (xvii) the overall global economic environment and trade tensions, including the adoption or expansion of economic sanctions, tariffs or trade restrictions, (xviii) challenges and risks related to sales to government entities and highly regulated organizations, (xix) the impact of competition and new technologies, (xx) limitations and exclusivity provisions in our customer agreements and restrictions on the use of intellectual property, (xxi) our ability to ensure that our solutions interoperate with a variety of hardware and software platforms, (xxii) our plans to continue to invest in research and develop technology for new products, (xxiii) our plans to potentially acquire complementary businesses, (xxiv) the impact of future pandemics on our business and on the business of our customers, (xxv) fluctuations in foreign currency exchange rates, (xxvi) security, political and economic instability in the Middle East that could harm our business, including due to the security situation in Israel; and military conflicts with Iran and terrorist organizations, (xxvii) the increased expenses and requirements associated with being a listed public company on the Nasdaq Capital Market, or Nasdaq and (xxviii) the unknown effect on the price of our common stock of the dual listing of our common stock on the Tel Aviv Stock Exchange, which took place on April 9, 2026. These and other important factors discussed in Odysight.ai’s Annual Report on Form 10-K filed with the Securities and Exchange Commission (“SEC”) on March 19, 2026, and our other reports filed with the SEC, could cause actual results to differ materially from those indicated by the forward-looking statements made in this presentation. Except as required under applicable securities legislation, Odysight.ai undertakes no obligation to publicly update or revise forward-looking information. This presentation contains trademarks, trade names, and service marks of other companies, which are the property of their respective owners. We do not intend our use or display of other parties’ trademarks, trade names, or service marks to imply, and such use or display should not be construed to imply, an endorsement or sponsorship of us by these other parties.

Who We Are

Odysight.ai's AI-powered platform monitors critical systems in real-time, detecting potential failures and predicting them before they occur

**Redefining the standard for
operational Predictive Maintenance**

About Us | Nasdaq/TASE: ODYS

What We Do	Proprietary micro-sensors, new data; Cross-domain AI analytics, H/W-based SaaS
Geographic Reach	Presence in Israel, USA & Europe; Targeting Operators, OEMs & MROs ^[1]
Domain Leadership & Expertise	Experience across aerospace, transport & industry; Global industry board representation
Commercial Progress	\$14M backlog ^[2] and active deployments driving growth in orders and operational programs across sectors

[1] MRO - Maintenance, Repair, and Operations.

[2] Backlog is measured and defined differently by companies within our industry. We refer to "backlog" as our booked orders based on purchase orders or hard commitments but not yet recognized as revenue. Backlog is not a comprehensive indicator of future revenue and is not a measure of profitability. Orders included in backlog may be cancelled or rescheduled by customers. A variety of conditions, both specific to the individual customer and generally affecting the customer's industry, may cause customers to cancel, reduce or delay orders that were previously made or anticipated. Projects may remain in backlog for extended periods of time. As of March 31, 2026.

Odysight.ai[®] TruVision[®] Platform

A comprehensive Health Monitoring solution architecture

Precision Aircraft Diagnostics

Odysight.ai[®] delivers real-time multi-sensor monitoring and prediction of faults during the entire flight cycle

Live visual insights reduce diagnostic evaluation time, enhance accuracy, and boost mission readiness

Odysight.ai[®] FLVID
OS, App & Algo Toolkit

The Challenges Caused by Modern Usage

01

Operating Beyond Design Limits

Mission demands push platforms beyond certified limits, with maximum take-off weight routinely exceeded

02

Operational Tempo

Zero downtime between missions; multi-domain operations rapidly increase fleet cycles

03

Distance & Endurance

Long-range missions require early detection of latent failures

04

Maintenance Limitations

Scheduled maintenance misses real-time degradation; Aviation fleets must be mission-ready on demand

©2026 Odysight.ai® Proprietary. All rights reserved.

Odysight.ai[®] Solutions & Value Proposition

01

Adaptive Asset Utilization

Maintain safe performance and peak functionality beyond normal limits with continuous condition visibility

02

Minimized Downtime

Reduce maintenance burden, enabling continuous operation with fewer interruptions

03

Mission Readiness

Enable early detection and proactive intervention across extended missions

04

Decision-Making Advantage

Real-time health monitoring alerts of degradation to avoid mission failure

**Maintenance is no longer a backend function.
It is a frontline enabler.**

Sensor Detection Capability Matrix

Odysight.ai® is disrupting the PdM market, across multiple domains and failure modes

Top Failure Mode Families	Failure Mode	PHM Monitoring Methods						
		Odysight.ai® Computer Vision	Vibration	Acoustic Emission	Oil Debris	Temperature	Pressure	Electric Current
Airframe Integrity	Surface cracks, corrosion, delamination	✓	X	✓	X	X	X	X
	Overheating damage	✓ (w/infrared wavelength)	X	X	X	✓	X	X
	Material deformation/fracture	✓	X	✓	X	X	X	X
Mechanical Integrity	Loose fittings and fasteners, nuts, etc.	✓	X	X	X	X	X	X
	Foreign Object Damage (FOD)	✓	X	X	X	X	X	X
Dynamic Behavior of Quasistatic Components	Damage in control bell crank, belts, push-pull rods, cables, etc.	✓	X	X	X	X	X	X
Liquids & Lubricants	Hydraulic leakage, blockage, etc.	✓	X	X	X	✓	✓	X
	Lubricant contamination	✓	X	X	✓	X	X	X
	Fluid Level, leak rate monitoring	✓	X	X	X	X	X	X
Rotating Component Integrity	Gearbox wear	△	✓	✓	✓	✓	✓	X
	Bearing Fault	X	✓	✓	✓	✓	X	X
	Imbalance & misalignments	△	✓	X	X	X	X	X
	Pump/Motor failure	△	✓	X	✓	✓	✓	✓

Management Team

Yehu Ofer | CEO

Col. (ret.) IAF, formerly senior executive at Elbit Aerospace, leading major R&D full-scale development programs; Managed Elbit Brazil BU; Served as defense attaché in Italy

Einav Brenner | CFO

20 years of Financial Leadership; Formerly VP Finance at Solato, Ex. Dir. of Finance at Redhill Biopharma (Nasdaq: RDHL) and senior roles at Vizrt (Oslo;VIZ), Viola Ventures and PwC

Eilam Sagi | CBO

Col. (ret.) IAF, formerly Deputy Director General at Israel's Ministry of Transportation, VP Asset Management at Enlight Renewable Energy, Head of the IAF Budget Dept.

Alex Kushnirsky | VP Product

PHM/CBM expert with 25+ years in defense and aviation, Former IDF Lt. Col. (ret.) and IMOD R&D Officer, leading major R&D in PHM and SHM programs in the IAF

Ronen Tanami | VP R&D

Senior executive with 30 years of global IT and communications leadership; Former SVP at Amdocs; Driving global operations, R&D, and AI-based product innovation

Gal Shir | VP Operations

Former COO at Elta; Previously held senior engineering and operations leadership roles at TAT Technologies, leading production operation excellence and advanced OEM programs

Board Members

Prof. Benad Goldwasser

Professor of Medicine, entrepreneur, and investor; Co-founder of multiple medical device companies, with deep experience in innovation and commercialization

Moshe (Mori) Arkin

Founder and Chairman of Arkin Capital; Chairman of Sol-Gel Technologies and Interim CEO since 2025; Leading global healthcare investor; Sold Agis to Perrigo

Jackson Schneider

Former CEO of Embraer Defense & Security. Aerospace and defense leader; Adjunct Professor at Columbia University and advisor to global organizations

Inbal Kreiss

Chief of Innovation at IAI and Chair of Israel's RAKIA mission; Aerospace and defense expert with leadership in national-scale programs

Nir Nimrodi

Former Chairman and CEO of Accellix; Life Sciences executive with growth-stage expertise; Previously Chief Business Officer at Precigen

Zeev Vurembrand

CEO of Vurembrand Management & Innovation; Formerly CEO of Clalit Health Services; Extensive board and operational leadership experience

Ronit Rubin

EMEA President at AllCloud; Defense and cloud executive; formerly IDF Navy Commander of Computer Systems, with extensive experience in large-scale systems

Dr. Carlo Papa

Chairman of Odysight.ai EU; Senior Fellow at Columbia University; Formerly senior executive at Enel with expertise in energy and sustainability

Blue Chip Investors

Supportive long-term institutions with over 65% ownership

Approximate beneficial ownership of outstanding shares of common stock as of March 31, 2026, based on SEC filings and Odysight.ai records

**Kranot Hishtalmut Le Morim Ve Gananot Hevera Menachelet Ltd. (Managed by Meitav Dash)*

Next Steps

Leverage Established Defense Relationships

IAF, IDF, and IMOD partnerships - a springboard for global expansion

Building Up on European Hub

Leveraging the new EU presence to expand across NATO-aligned markets following the positive Italian Air Force test success

Enter Emerging Markets

Strategic positioning in Southeast Asia to support regional fleet modernization and industrial growth

Non-Organic Growth

Selectively drive expansion across our product portfolio, geographic reach, and client base

Thank you.
